

A powerful workflow converter to accelerate your K2 Five success

## We want to help you get on with K2 Five fast

K2 Five is here. It comes with a new process designer. It is revolutionary.

Processes designed in legacy versions of K2 are no longer supported in the K2 Five Designer and will need to either be recreated or converted to enable editing.

## Go Be Great with K2 Five!

PowerToolz Express helps you to convert your K2 4.7 process definitions into the modern K2 Five infinite process designer canvas.

**Analyse, Convert, Save and Report** on conversion outcomes.

Don't start from zero. Save time and resources by automating the rebuild of what can be converted. Create reports and visual place holders for what can't.

**Go to <http://www.jeylabs.com/PTE> for more information**

Regression Testing of your current K2 applications, converted workflows and applications in development is key to the success of your organisation's K2 Experience.

## Information Sheet

**Q:** Where do I go to download PowerToolz Express?

**A:** <https://www.powertoolz.com.au> and fill out the eval request form.

**Q:** What do I need to do when running the PowerToolz Express installer?

**A:** When installing PowerToolz Express, always 'Run As Administrator'

**Q:** When I download and install PowerToolz Express, what functionality do I get?

**A:** With the free 'eval' licensing, you are able to use the tool for non-production use for a limited time. In eval mode you can explore your K2 environment and produce individual workflow analysis reports. The report gives you in-depth advise on what parts of the workflow can be converted and what to do about the rest. Once you have purchased a license then you can save the converted process so that you can open it in the K2 Five process designer to modify it and deploy it on your K2 Five server.

**Q:** Does PowerToolz Express analyse the KPRX and identify the deprecated components?

**A:** Yes, PowerToolz Express analyses KPRX core and identifies the deprecated components and reports it within both the analysis report and the conversion report

**Q:** What happens to activities that cannot be converted?

**A:** Placeholders are rendered for activities that cannot be converted, allowing you to quickly locate them and make the appropriate configurations. Further support is presented through a comprehensive analysis and conversion report to guide you to quickly get your process up and running within K2 Five

**Q:** How can a developer identify the deprecated components in the converted K2 Five workflow?

**A:** PowerToolz Express adds placeholder text where deprecated components existed and new

**Q:** Which SharePoint Wizards do you support?

**A:** We support all SharePoint wizards supported by K2 Five

**Q:** Does the conversion process overwrite my legacy KPRX files or deploy them to K2 Five?

**A:** PowerToolz Express does not overwrite legacy versions of the KPRX file. The tool takes KPRX files (either created in K2 Studio or deployed from K2 Designer) and converts them to a format which is saved to the K2 five server thus allowing you to open and edit it with the new K2 five process Designer. When you are ready, you can deploy the process from the designer to make it become the latest

## Information Sheet

**Q: Where can I get support?**

**A:** Go to <https://pte.jeylabs.com> and create a support ticket. You can register your account for free using your work email address there.

**Q: Which Dynamic CRM Wizards do you support?**

**A:** We support all Dynamic CRM wizards supported by K2 Five

**Q: Will PowerToolz Express convert 100% of my processes?**

**A:** PowerToolz Express is designed to give you a terrific head start in your K2 Five upgrade process. We will never be able to convert 100% of all K2 processes ever created. There are many processes where we have been able to achieve 100% conversion. Our conversion rate sites at around 80% - 90% of all processes we have tested.

**Q: Which DocuSign Wizards do you support?**

**A:** We support all DocuSign wizards supported by K2 Five

**Q: How often do you update PowerToolz Express?**

**A:** PowerToolz Express is updated constantly. We release minor updates every 2-4 weeks and major updates every 6-8 weeks. The latest version is immediately made available for download and install. You are encouraged to update the tool as soon as we release an update.

**Q: How do I purchase PowerToolz Express?**

**A:** PowerToolz Express is available for purchase under an annual subscription license. This license gives you unlimited internal use for an annual fee of \$4500 USD.

Make your purchase at <https://www.powertoolz.com.au>

**Q: Why should I upgrade to PowerToolz for K2?**

**A:** PowerToolz Express is a workflow converter. It does not provide Test automation or other numerous nifty capabilities to make your testing, troubleshooting or administration of K2 easy.

PowerToolz for K2 provides three major capability sets. **Automated Testing, Administration and Trouble Shooting** features for K2. Go to <https://www.powertoolz.com.au> for more information.

## Information Sheet
